PREFACE

DR. FORTIER BERNOVILLE was the director of L'HOMOEOPATHIE MODERNE, a bi-monthly homoeopathic review, which was published so far as I know up to the year 1939. From the year 1932, I regularly received this periodical and I have translated many articles from this periodical and have published them in english, in Hahnemannian Gleanings and in bengali in "Hahnemann" and "Homoeopathic Chikitsa". Some of my articles were also published in the "Hahnemannian" and in other periodicals of India.

The first article of DR. FORTIER BERNOVILLE is a new translation which I have included in this book, with another article by the same author. The second article was published in "Hahnemannian Gleanings".

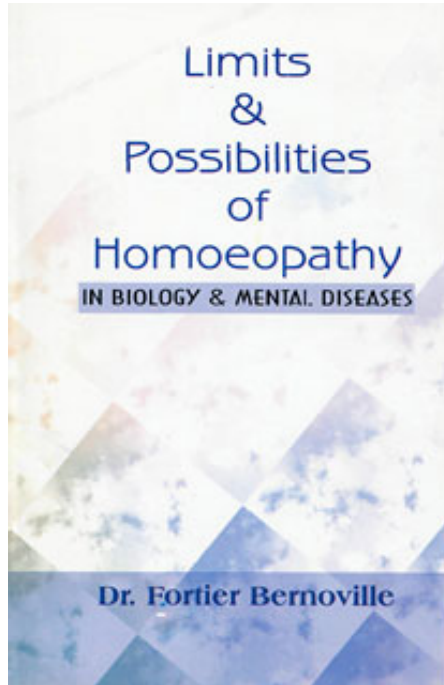

I hope that these two articles will be read by the homoeopathic professionals with interest.

Lastly, I must say that nothing as regards science

and its application remains concealed. So medicine is also on the way of constant evolution. Hahnemann has given us the skeleton of his "similia similibus curentur" and "infinitesimal dose". It is our duty to develop them with flesh and blood.

Chandan Nagar,
March, 1983.

Rajkumar Mukerji
