PREFACE

Each one of us as a child discovers things and has our 'eureka moments'. Later in life as we begin to believe that we know everything we need to know we lose this curious little child within us. But every now and then we are confronted with situations where we discover some truth. These are our eureka moments when we feel we have been touched by some mystical power in the universe and have understood something cosmical.

To us discovery of the sensation of nosodes and imponderables has been such an exciting moment. Needless to say that our patients led us to them. Hence the process of case-taking in cases where we gave imponderables and nosodes was like going on a discovery trip and finding something new. We are a couple practicing and teaching Homeopathy since 1997 in Mumbai. We have been trained in Classical Homeopathy. We strongly believe and practice the Sensation method of Dr. Rajan Sankaran, since 2001. We have been part of this method since its very roots and have contributed to it by our own experiences and teachings for the past decade. In this book you will see how we have found the sensation of the imponderable and nosode remedies and how to use them using the Sensation method.

Our first interaction with these remedies was way back in 2003 and since then we have developed a deep connection and understanding of these remedies through more and more cases over the past eight years. There has been an increasing demand on us to put into a book form all our ideas and experiences so that we can reach many more people than the ones who have been lucky to have attended the seminars on these topics.

Shachindra and I have always liked the idea of discussions and dialogue in our teachings which has been clearly reflected in our previous book. We always attempt to strike a friendly chord with our readers, students and patients. In keeping with our style, this book feels like an informal talk as versus a typically formal book. Also, there are times in the book where we have written 'we' and there are times when we have written T. This is just going with the flow of the book at that point.

Since we have given all the details of imponderables and nosodes very systematically in this book, it becomes a 'must read book' for even those who have attended our seminars.

Joshi B. / Joshi Sh.
