Homeopathic Self-treatment	83
Taking your Medicine	85
Questions and Answers (FAQ)	87
Bibliography	93
Addresses	95

Preface

1st-3rd Edition

We noticed, in our daily work with our patients, that there was a great need for an easily understandable introduction to Classical Homoeopathy.

We were particularly requested to explain the basis of Classical Homoeopathy, since it is so often confused with other alternative health practices. It is, in fact, an independent science with its own laws. Furthermore, a well-informed patient can better understand the course of his or her treatment contributing to a speedier recovery.

These methods of treatment require a different understanding of health and disease. The patient must be prepared to confront his illness and the healing process.

With this book, and a variety of seminars, we wish to add to the amount of information available and to bring Classical Homoeopathy to a wider audience.

4th Edition

The large demand - over 10 000 copies sold in German-speaking Europe - and the many positive comments from colleagues and patients have given us great pleasure. This shows, that Classical Homoeopathy is well established and widespread.

Now we have the fourth corrected edition ready. We reviewed and expanded the entire content. The following innovations enhance this edition: we supplemented the various chapters with case histories taken from everyday practice. The chapter on the Miasms has been greatly expanded after many requests from various quarters. The chapter on Constitutional Treatment is new, as is the chapter on Frequently Asked Questions in daily practice.

At this point, we wish to thank all those who helped to add to this new edition with their various comments. Also our thanks to Brigitte Kurath and Kathrin Buchi-Moller for their invaluable support.

Heidi Grollmann Urs Maurer

Translator's Foreword

This book will always remind me of the beautiful Greek island of Alonissos. I first came to know of the book during an International Open Teaching Seminar on Homoeopathy, taught by George Vithoukas, on Alonissos. It is such a beautifully produced and simple text, and I just knew that the English-speaking world would want to have the benefit of its easy and attractive introduction to Classical Homoeopathy.

Patients and future patients of homoeopathy will find in this book a clear and easily understandable introduction to the basics of the most powerful system of medicine in the world.

This book will appeal to all homoeopaths who have been looking for a simple text that communicates to their patients the essence of what we, as homoeopaths, do and why we ask such an awful lot of strange questions. I expect it to be on sale in most homoeopathic practices that wish their patients to be as informed as possible about the nature of their treatment.

The authors of this book, Heidi Grollmann and Urs Maurer, are two of the nicest people and most passionate homoeopaths that I have ever had the privilege of meeting. They run a busy practice, a thriving School for Classical Homoeopathy, seminars for professional and lay-person alike, write very appealing books on homoeopathy, and still find time to run marathons and holes into the Zurich pavements.

All the wisdom and creativity is theirs, all the faults mine.

Hans G. Schrauder BSc LCH MHMA MGCP
