40. CARBO VEGETABILIS

Blood helps to build cells, and tissues. The excess of carbon in blood produces *sluggishness* and *laziness*; and causes a tendency to *chronicity of complaints*, so it necessitated vegetable charcol, now what we call as Carbo-vegetabilis to cut of the excess of the carbon in blood, as diamond is required to cut a diamond.

Scientists proved, that life came into existence by the combination of water and this carbon. Carbon has the properties of creating, protecting and destroying the cells; so I listed this in the tissue builders. Disintegration and imperfect oxidation is the *key-note* of this remedy. If the carbon becomes excess in blood it stagnates in capillaries, producing *blueness*, *coldness* and *ecchymosis*. Body becomes icy-cold and blue. Bacteria can thrive well in this nearly life-less blood-stream and sepsis and typhoid state ensues.

MODALITIES : > by belching; fanning. < by eating
