## INTRODUCTION

*The purpose of this seminar is to get a better insight in the appearance and the structure of the personality of the "Carcinosinum" patient on the basis of clinical cases.*

*Therefore it is extremely important that the shown cases have really reacted "demonstrably" to the prescribed remedy.*

*Apparently, in practice it often happens that a patient reacts "seemingly" well to a prescribed homoeopathic remedy, but when the complaints return (the same complaints) it seems that the patient does NOT react anymore to the same remedy, and also not to the same remedy in another potency.*

*The reason why he reacted well the first time and does not react anymore afterwards, is not clear to us. You can call it the "placebo" effect, or what else.*

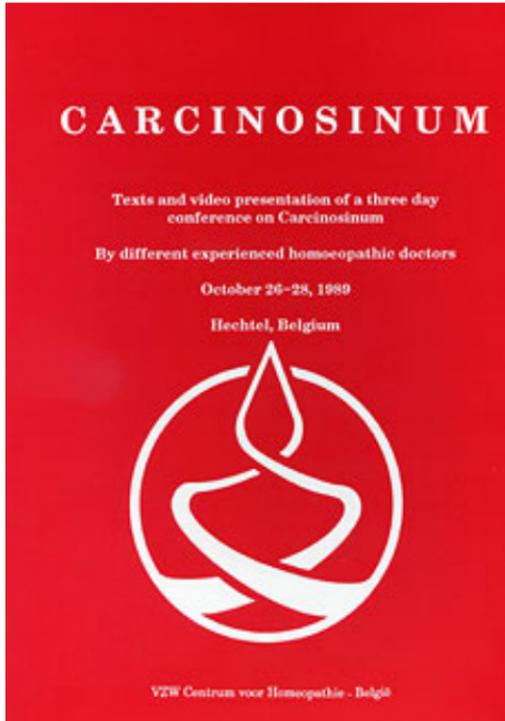

*The fact is that these kinds of situations frequently occur, especially with large polychrests.*

*Therefore it is important to show "long term"-cases, which did not only react well once to the remedy, but which again and again improved fundamentally after the administration of the remedy, until the moment a new picture with eventually other complaints shows up.*

*Only these cases are very interesting and provide practical study material with the purpose to understand the remedy better.*

*We hope that this seminar will supply these conditions.*

*Alfons Geukens*
