better from cold drinks; drawing, stitching, tearing pain in ear; tearing behind ear; pulsation in ear; tingling of the ears; twitching; hearing impaired, finally lost.

Catarrh of the nose with copious, thick yellow discharge; coryza fluent with fever; dryness in the nose; epistaxis. Itching in the nose; the nose is obstructed; rawness in the nose. A red nodule on the side of the top of the nose; stitching pain in the nose. Frequent sneezing; sneezing in sleep without waking.

Inflammation of the throat and tonsils; recurrent tonsillitis from taking cold; dryness in throat. Enlarged tonsils; elongation of the uvula with sore throat; viscid mucus in the throat; pain in the throat and ear, worse on right side; with salivation; worse on swallowing; burning in the throat. Suppuration of the tonsils. Swallowing very difficult. Swollen tonsils. Varicose veins in the throat. Swelling and induration of the cervical glands.

BELLADONNA

EARS-Piercing, aching, sharp pain, pinching, squeezing, and shooting in the ears.

Inflammation of the external and internal (right) ear, with discharge of pus.

Excretion of pus from the ears.

Stinging in and behind the ears.

Ringing, murmuring, and buzzing in the ears.

Humming and roaring in the ears.

Paralysis of the auditory nerves.

Great acuteness of hearing.

Hardness of hearing; sometimes as if there were a skin before the ears.

Swelling of the parotids, with shooting and tractive pains, which sometimes extend even to the throat.

Stitches in the parotid gland.

NOSE-Pain, as of a bruise, in the nose, especially on touching it, and sometimes with burning.

Nocturnal shootings in the nose. Swelling, redness, and burning at the point of the nose. Inflammatory swelling and redness of the external and internal nose. Bleeding of the nose, with redness of the face. Painful ulceration of the nostrils. Nose very cold.

Bleeding of the nose, chiefly night and morning.

Haemorrhage from the nose and mouth. Great dryness of the nose.

Sense of smell either too sensitive, especially to tobacco smoke, or diminished.

Putrid smell in the nose.

Fluent coryza of one nostril, alternating with stoppage of the nose.

Smell like herring in the nose during the coryza.

THROAT-Pain of excoriation, scraping, and shooting in the throat and in the amygdalae, principally on swallowing, and sometimes extending to the ears.

Great dryness and burning in the throat and on the tongue.

Inflammation and swelling of the throat, of the velum palati, of the uvula, and of the tonsils; suppuration of the tonsils.

Inflammation of the throat, with sensation of a lump, which induces hawking, with darkness and swelling of the velum palati and tonsils.

Burning and dryness in the oesophagus.

Stinging in the oesophagus, in the tonsils; worse when swallowing, and when talking.

Tonsils inflamed, swollen, ulcers rapidly forming on them.

Painful and difficult deglutition.

Complete inability to swallow even the least liquid which frequently passes out through the nostrils.

Constant inclination to swallow, with a sensation as though suffocation would otherwise follow.

Sensation of contraction, strangling, and spasmodic constriction in the throat.

Sensation as if there were a tumour in the throat, or a plug which cannot be detached.

Paralytic weakness of the organs of deglutition.

ANALYSIS

In inflammations of the ear which go on to suppuration *Bell*, is rarely useful. We may have the pain, tenderness, oversensitiveness, all inflammatory conditions; but cases requiring *Bell*, rarely go on to suppuration.

Great dryness; a sensation of dryness. Dryness in the nose; mouth; of the tongue; in the throat. These are so general that with the nose symptoms, the coryza, the throat symptoms, the cough, this is intensified; dryness of the mucous membrane will generally be found. Then there is coryza with much sneezing. Pricking, burning in the nose. Hot sensation in the nose.

Little fine ulcers in the throat no bigger than a pinhead. Aphthous patches bleed. An aphthous inflammation of the throat; but the most of the complaints of the throat are dry and red. Great tumefaction. Extremely sensitive; much swelling; inability to swallow. Great pain on swallowing, with all the sensitivity of the surrounding parts, with the sore throat, and with the inflamed throat. Inflammation and swelling of the tonsils, with red face, intense heat, throbbing carotids, high fever, coming on from cold. Fauces and pharynx deep red. Soft palate and tonsils swollen. Swallowing painful, particularly of fluids. Constant scraping and hawking in the throat. The pharynx and larynx are very commonly in a state of spasm; partly from dryness, partly from extreme sensitiveness of the nerves of the part. Clutching from extreme sensitiveness of the nerves of the part. Clutching of the throat on going to sleep, clutching of the throat on coughing. Spasms of the oesophagus. Spasmodic constriction of the throat. Constrictions that are spasmodic. Constrictions of the larynx, of the pharynx, of the throat *Bell*, has constrictive pain in parts that feel like the clutch of fingers. This constriction that comes in the sore throat occurs just in the act of swallowing fluids or solids, and that action will force the food and fluids up into the nose, and sometimes out of the nose. Rapidly forming

aphthous patches upon the tonsils. With the sore throat we will always find an enlargement and inflammation, or soreness of the glands, under the jaws about the neck. Tenderness along with a *Belladonna* sore throat is a natural concomitant.

BENZOICUM ACIDUM

EARS-S welling behind ears, which seems to reach periosteum.

Sound as of confused voices in ears, worse when swallowing, or walking in open air.

NOSE-Seems to smell cabbage, dust, or something stinking.

Sense of smell diminished. Epistaxis.

Sneezing with hoarseness.

Cold easily caught.

Pressure at root of nose.

Pain in bones of nose.

Itching of septum.

THROAT-Sensation as of a lump in the pit of the throat, as if some food had lodged there.

Sensation of swelling or constriction in the throat.

The throat symptoms are relieved by eating.

Swallowing difficult, incomplete; with noise in ear; with soreness on back of tongue.

Heat in oesophagus. Thyroid

gland feels swollen.

Angina faucium and tonsillaris, with characteristic urine.

ANALYSIS

When all the gouty symptoms of the body cease, inflammation of the tongue comes on. Peculiar kinds of sore throat take place from this same cause. Sudden stoppage or slacking up of the quantity of urine; it becomes scanty, high coloured, and pungent, smelling like that of a
