INTRODUCTION

The purpose of writing this book is sharing the vast experiences which I gathered during my undergraduate, post graduate and private practice.

It is impossible for one man to master all the various modalities of homoeopathy, hence, even after thorough institutional training, we find ourselves in dilemma when we start practicing the art that we have learnt. To remove this dilemma, either we try to study more, or we catch up with an experienced teacher or guru who can guide us.

Tips in homoeopathy is as old as Hahnemann. Ever since homoeopathy was introduced in 1796, the ocean of tips started forming drop by drop. I feel every homoeopathic physician in the world has his own tips to contribute which are very valuable, but unfortunately it doesn't come into existence, because, either homoeopaths are too shy or too secretive to present before the profession or it could be a lack of initiative to collect and present them in a book form.

However, I am grateful to Dr. Jahr, who for the very first time gave to the profession a book called "Forty Years of Experience" which was followed by Hering's "Domestic Physician". Subsequently, were Dr. Bishambar Das Roy Chaudhry, followed by Clinical Tips by Sundervardhan, followed by Quick Bedside Prescriber by Dr. J. N. Shingal and Clarke's The Prescriber.

I salute to all of them for being so courageous and sincere, and helping thousands of homoeopathic doctors all over the world by their contributions.

HAZARDS OF SPECIFICS

The lay practitioners, the people who read homoeopathic articles in newspapers, young immature homoeopaths are the culprits who play havoc with the health of their friends, relatives, well wishers and neighbours etc.

WHAT ARE THE LONGTERM OUTCOMES OF SPECIFIC PRESCRIBING?

1. Suppression -

Here the symptoms travel inwards i.e. from less important organs to more important organs. E.g. Somebody who is suffering from allergic rhinitis, reads the news paper and takes Arsenic Album. After a few months this allergic rhinitis is much better but now ops frequent attacks of bronchial asthma. If this state is not become a chronic asthmatic ' immediately refered

2. Drug Induced Disease -

Taking homeopathic medicines one after the other, frequently happens amongst laymen who abuse specifics and create an artificial drug induced disease, e.g. A person complains of itching in the inner canthus of the eye. For this complaint he is prescribed by a quack Zincum Metallicum 30 as a specific. After a few months, his itching of the inner canthi is much better, but he still Keeps on taking the medicine for months together. When the medicine is continued for a long period, he may develop other symptoms which may belong to the remedy. Thus in certain sensitive cases you may get a proving of Zincum Metallicum.
