PREFACE

Medical Sciences are rapidly progressing and so is the subject of Biochemistry.

The aim of writing this book is to provide fundamental and up to date knowledge on the subject, to fulfill primarily the needs of undergraduate medical students, interns and residents.

This book has been written giving due consideration to the recent trends in the university examinations and the various competitive exams.

Chapters have been written in a simplified and easy to understand manner. Appropriate diagrams have been given wherever necessary to facilitate better understanding of the subject.

I hope the book will be very useful to students not only in acquiring a practical knowledge of the subject but also help them in mastering the examinations.

I request the readers to pass on all the good points of the book to others and all of the criticism to me.

Dr. Rashmi A Joshi
Dr. Manju Saraswat
